Birmingham Primary School, Mount Evelyn – Parking and Transportation Network

To the Parents of Birmingham Primary School students,

The Yarra Ranges Council have recently conducted a review of available parking and the transport network for Birmingham Primary School, Mount Evelyn. As you may be aware, there is significant volumes of traffic generated within close a vicinity to Birmingham Primary School specifically during pick up times.

As a result of the parking and transport network review of Birmingham Primary School, Council have created a transport network plan which outlines the available car parking spaces within a 400m radius of Birmingham Primary School that parents may have not considered. The plan also outlines the closest public transport network within the vicinity of the school.

Refer to the attached plan for further details.

We can appreciate and understand the preference for parents to park within a close vicinity to the school to make the pickup and drop off process of their children easier and efficient. However, should too many people wish to engage in the same parking behaviour, this can affect the efficiency of the network and cause undesirable delays.

We hope the information and purpose of the transport plan finds you well and can assist in bringing to your attention to a parking option or transport service you may not have previously considered.

Please note, parking restrictions may apply within the areas highlighted for available parking in the below map. Please familiarise yourself with the parking area and the enforced parking restrictions should you wish to change your parking location.

Should you have any queries regarding the transport network plan for Birmingham Primary School, please contact myself on the details provided above.

Yours sincerely,

Curtis Karajic Powell
